

DR. LIZ WARREN

Dr. Liz Warren is the Chief Scientist for NASA's Human Health and Performance contract. Liz is a physiologist with expertise in the effects of spaceflight on human physiology. She has been involved with spaceflight research for almost 30 years, including space shuttle missions, the Mir space station, the International Space Station, and the Orbital Reef commercial space station.

Liz was born and raised in the San Francisco Bay Area and attended the University of California at Davis for both her undergraduate and doctoral degrees in physiology. She has worked in NASA's mission control and has managed research for the ISS National Laboratory. Most recently, Liz helped to design the Orbital Reef space station as Director of Research Development at Blue Origin. Liz is a recipient of NASA's Exceptional Public Achievement Medal, and is a passionate science communicator and advocate for STEAM.
